

SLIDE CUE CARDS

Almoataz Adnan Salim Alqulhati

Student ID: 21F22010

Supervisor: Dr. Jitendra Pandey

Quick keyword hints for every slide — glance, don't read. Use these once you already know the content, as a memory trigger during practice or the actual defense.

CHAPTER 1 — INTRODUCTION

Slide 1 — Title

Name • ID • supervisor • one-line system summary

Slide 2 — Agenda

8 chapters • point to each as you name it

Slide 3 — Chapter 1 Divider

"Introduction" — one sentence, move on

Slide 4 — Background

Manual = paper + phone calls • slow • 3 goals: centralise, communicate, reduce workload

Slide 5 — Problem Statement

6 problems • count on fingers • slow comms, errors, workload, low parent involvement, no central system, lost trust

Slide 6 — Consequences & Solutions

Problem → solution table • point left then right

Slide 7 — Justification & Contribution

Why needed: errors + decentralised • contribution: reusable, practical

Slide 8 — Scope & Impact

In scope: attendance/grades/assignments • out of scope: fees/transport • 4 stakeholder benefits

Slide 9 — Aim & Objectives

1 aim, 4 objectives: needs → build → centralise → communicate

Slide 10 — Stakeholders & Features

5 stakeholders • 6 core features — list quickly

Slide 11 — Cost Estimate

Total: 984 OMR • biggest cost = hardware • software = free/open-source

CHAPTER 2 — BACKGROUND & LITERATURE

Slide 12 — Chapter 2 Divider

"Background & Literature Review" — one sentence

Slide 13 — Similar Systems

4 systems: PowerSchool (costly), Schoology (LMS), Google Classroom (no attendance), ClassDojo (no grades)

Slide 14 — Literature Themes

5 themes: parent engagement, accuracy, teacher efficiency, central systems, security

Slide 15 — Feasibility

5 checks: technical, cost, operational, schedule, legal → all feasible

CHAPTER 3 — METHODOLOGY & PLANNING

Slide 16 — Chapter 3 Divider

"Methodology & Planning" — one sentence

Slide 17 — Methodology Selection

3 options compared • Agile wins • flexible + feedback + incremental

Slide 18 — Agile Workflow

5 steps • sprint order: login → attendance → grades → assignments → notifications

Slide 19 — Work Breakdown

ProjectLibre • 5 phases: analysis, design, dev, testing, deployment

Slide 20 — Gantt Chart

Visual timeline • bars = tasks • used to track schedule

Slide 21 — Risk & Mitigation

4 risks: requirement change → Agile, bugs → early testing, time → Gantt tracking, resistance → simple UI + training

Slide 22 — Data Collection

3 methods: questionnaires (20 per group), observation, literature

Slide 23 — Survey: Students

Hard to track attendance/grades • want: view records, submit assignments

Slide 24 — Survey: Parents

Top ask: deadlines 55% • grades 20% • attendance 15% • want early alerts

Slide 25 — Survey: Teachers & Admins

Teachers: notify (45%) + grading (30%) • Admins: manual records (45%)

Slide 26 — System Requirements

Functional: 7 items (login, students, attendance, grades, assignments, notify, admin) • Non-functional: 6 (fast, usable, reliable, secure, scalable, maintainable)

CHAPTER 4 — SYSTEM DESIGN & IMPLEMENTATION**Slide 27 — Chapter 4 Divider**

"Design & Implementation" — biggest chapter

Slide 28 — Use Case Diagram

4 actors: Student, Teacher, Parent, Admin • what each one does

Slide 29 — System Architecture

3 tiers: browser → Apache/PHP → MySQL

Slide 30 — System Flow

Login → role check → dashboard → role-specific actions

Slide 31 — ERD

Users central • junction tables: student_classes, class_teachers • normalised, no duplication

Slide 32 — Database Design

10 tables total • mention junction tables for many-to-many

Slide 33 — Security Measures

4 things: bcrypt hashing, role-based access, input validation, backups

Slide 34 — Technology Stack

Front: HTML/CSS/JS • Back: PHP+PDO • DB: MySQL • Server: Apache/XAMPP

Slide 35 — Login Page

All roles, one page • role-based redirect • lock after 5 fails

Slide 36 — Admin Dashboard

6 cards (totals) + 4 charts (attendance, breakdown, grades, roles)

Slide 37 — Manage Users

Form: name/username/email/role • table: Details/Edit/Delete

Slide 38 — Manage Classes

Form: name/year/capacity • assign teacher + students via checkbox

Slide 39 — Teacher Dashboard

3 cards: classes, assignments, pending • today's attendance status

Slide 40 — Record Attendance

Pick class+date → Load → mark Present/Absent/Late → Save

Slide 41 — Manage Grades

Pick class/student/subject/exam type → mark 0–100 → Save

Slide 42 — Assignments (Teacher)

Title, class, deadline, file • table shows submissions + open/closed

Slide 43 — Submissions View

Who submitted vs who didn't • download link for submitted work

Slide 44 — Send Notifications (Teacher)

Pick recipient (student/class/parent/all) → write → send • history below

Slide 45 — Teacher Inbox

Received messages • unread highlighted • broadcast = orange badge

Slide 46 — Student Dashboard

3 cards: attendance %, pending assignments, GPA • upcoming deadlines

Slide 47 — My Attendance

Present/Absent/Late counts • % bar • warning under 75%

Slide 48 — My Grades

GPA + letter grade • grouped by subject • full exam table

Slide 49 — My Assignments

2 tabs: Pending (upload) / Submitted (status)

Slide 50 — Student Notifications

Inbox • sender, date, title, message • broadcast badge

Slide 51 — Parent Dashboard

Child's name banner • 3 cards • attendance + grades tables

Slide 52 — Child Details

Month filter • full attendance history • progress bar

Slide 53 — Parent Notifications

Alerts from teachers/admin • broadcast badge

CHAPTER 5 — TESTING & EVALUATION**Slide 54 — Chapter 5 Divider**

"Testing & Evaluation" — one sentence

Slide 55 — Testing Strategy

6 types: unit, integration, system, security, usability, UAT

Slide 56 — Sample Test Cases

8 examples, TC-01 to TC-08 • all passed

Slide 57 — Test Results

18 total • 16 first-try • 2 fixed • 100% final pass rate

Slide 58 — Deployment

Apache/PHP/MySQL cloud • 6 steps: setup → upload → import DB → accounts → train → go live

Slide 59 — Evaluation vs Objectives

All 4 objectives met — quick recap of each

Slide 60 — Strengths & Limitations

Strengths: security, clean DB, consistent UI • Limitations: no email/SMS, no export, manual backup, no mobile app

CHAPTER 6 — CONCLUSION & FUTURE WORK**Slide 61 — Chapter 6 Divider**

"Conclusion & Future Work" — final chapter

Slide 62 — Conclusion

Aim achieved • all 4 objectives met

Slide 63 — Future Work

6 items: mobile app, Arabic, documents, analytics, email/SMS, export reports

Slide 64 — Impact

4 areas: social, ethical, legal, sustainability

Slide 65 — Reflective Summary

Went well: 100% pass rate • Hard: database design • Learned: PHP/MySQL/UML • Next time: backups + export earlier

Slide 66 — Thank You

Thank panel • stand still • wait for questions

Glance at the keywords, then speak naturally. You know this system better than anyone in the room.
